

We can now calibrate your Advanced Driver Assistance Systems (ADAS) on your car! This includes front radar, all cameras, lane change cameras etc.

Advanced Driver Assistance Systems are developed to automate, adapt, and enhance vehicle systems for safety and better driving. Most road accidents occur due to human error and ADAS systems are proven to reduce road fatalities by minimizing this human error.

When your car's front bumpers or mirrors etc. are removed or your front bumper is knocked (hitting a bird or object) a full re-calibration should be carried out.

NEW - ADAS Calibration

We specialise in VW, Seat, Skoda, Audi and Landrover

Does your garage have dealer tools to carry out the following...?

- Offer the latest software updates?
- Register Service on line with the dealer?
- Program keys / control units etc.?
- Have a direct helpline with dealer master technicians?
- Offer a range of courtesy cars to keep you on the road?

IF NOT, you may be using the **WRONG** garage

SEAT

SKODA

Audi
